Felix Hall wins Molecular Physics author's award

EIP associate Felix Hall has been awarded the 2013 Young Author's prize for a paper he had published by the journal <u>Molecular Physics</u>.

Felix's <u>paper</u> was entitled 'Light-assisted cold chemical reactions of barium ions with rubidium atoms' and was published in 2013 by the Taylor & Francis publication.

The Young Author's prize is an annual award from the journal to "highlight the highest quality work of the next generation".
